Обо мне

- Front End Developer (Markup Developer) at Hot Software, Chisinau
  January 2021 — July 2022
  Main responsibilities:
  User interface development
  Email templates / landing pages development
  Website maintenance and enhancements to websites
  Review, updates, and improvement of existing websites
  Collaboration with back-end developers and web designers to improve usability
  Assist the front-end team in web development projects

Achievements:

Markup development of the big project from the very beginning till the end on my own

Improvement of HTML and CSS for one of an old product that improved the loading speed

Patronage junior markup developer in our team and his full integration in the working process

Introduction of new CSS features that allowed avoiding part of JS in one of our products.
