Образование

- **Specialist**

Russian New University

September 2008 - May 2015

- **Web Developer**

Yandex Practikum

January 2020 - January 2021

Обо мне

About me:

Skilled Web Engineer - I have been actively working in the IT field for more than 4 years. Mainly work with React + Redux + React Hooks + React Query + TypeScript, and I think this stack is the best solution for creating high-quality web applications.

Have experience working with layouts on Figma, Adobe XD, and Zeplin, I prefer working with popular frameworks - Material UI, AntDesign, Styled Components, Story Book, and adaptive layouts for all necessary devices (PCs, tablets, mobile devices).

I regularly replenish my knowledge base with new technologies and improve my skills. Able to work both in a team and independently, providing high-quality results on time.

My main goal is to build strong partnerships and achieve the success of the product that we create together.

Basic skills:

- Application development from scratch using JavaScript, React.js/Redux/React Hooks, Material UI, Ant Design, HTML/CSS, SCSS, Saas;

- SPA development;

- Working with the API - Google(custom map, weather), Telegram, WebSocket, Prismic io, SoundCloud;

- Working with Nginx - configuring the distribution of data from the server to the client;

- Unit & E2E testing - React Testing Library, Jest, WebDriver iO;

- Development methodologies - Agile, Scrum;

- Version control - GitHub, Gitlab;

- revision of existing applications - I can quickly understand and work with the code base

- Code Review
