

Alexey Kozinets — Python developer

⬆ Junior
📍 Belarus, Minsk; Europe
💰 700 - 1 000 USD/MONTH
✉ Контакт: geeklink.io/cv-36319

Навыки

CSS, Django, Git, Google Sheet, HTML, JS, Python, SQL, VBA.

Опыт работы

- **OJSC “PLANAR”**

2016/till now - Lead Design Engineer

- **Freelance**

2022/till now - Python Developer

Образование

- **Machine Engineering Technology**

Belarusian National Technical University
2011/2016

- **Mechanical Engineering, Drive Systems and Machine Parts**

The State Scientific Institution “The Joint Institute of Machine Engineering of the National Academy of Sciences of Belarus”
2018/2022

- **Web Application Development with Python**

ITAcademy
Jun 2022/ Sep 2022

Обо мне

Started programming in 2021.

I started with VBA, because I wanted to make an program for myself and others, which counted working hours (overtime and undertime) and which would have a user-friendly interface.

Now I am developing web applications. In particular, a website was developed for the holding, which includes child companies and their products.

Curious and patient.

As a result of postgraduate studies, a mathematical model of mechanical oscillations of precision drives was developed. Based on this model, a design technique that will minimize fluctuations in the drive has been developed too.
