## Обо мне

As a steadfast IT professional with a genuine passion for technology and teamwork, I am excited to explore employment opportunities that foster growth and offer relocation possibilities.

With a solid foundation in web development and applications, I have honed my skills in various technologies and frameworks such as Vue, Nuxt, React (Next.js, Gatsby), WordPress, React Native, jQuery, PHP, and Twig. My commitment to continuous improvement leads me to actively engage in code reviews.

Collaboration is at the heart of my work philosophy. I appreciate exchanging ideas, supporting colleagues, and working together to tackle complex challenges, believing that our collective knowledge is crucial to project success.

Although my initial interest in sports, particularly volleyball, was cut short by health issues at the age of 17, the experience became a catalyst for my transition into the IT field. The setback allowed me to fully immerse myself in developing a rewarding career from a beloved hobby.

I recognize the importance of lifelong learning and adaptability in the ever-evolving world of technology. By staying current with new technologies and development methodologies, I ensure my ability to contribute effectively to any team. My background in sports has instilled the values of perseverance, discipline, and teamwork that continue to serve me well in my IT career.

As a dedicated and adaptable IT professional, I look forward to joining a team where we can collaborate to create innovative solutions and drive success in the digital landscape.
