Обо мне

Dear Hiring Manager,
I am applying for the job posting where you mentioned your need for Designer. I would be very happy if you please consider my candidature for the posting.
I want to give you a clear view of the contribution I can make to your product development efforts as a UI and UX designer. My educational background is mainly in Computer Science, in which I hold both a Bachelor of Engineering and a Master of Science degree. I also possess great skills in the graphic side of web design, experimenting with programs in the Adobe Creative Suite, such as Adobe Photoshop, Adobe Illustrator, and Adobe After Effects.
Last 5 years I have engaged myself in many UI-related projects due to my strong background in creative UI designs. I would like to also add that I have developed a wide range of forward-thinking user interface programs, which have all improved user experience and this has aided my talented knowledge in the course and responsibilities of this position. So for every possible reason, I can claim that I have proficient knowledge of the process and responsibilities required for this position.
So, If you are looking for an expert UX and UI designer who knows not only where to put the submit button but exactly what it should look like, look no further. Understanding mobile programming is important to know the user's interest in UI.

Thanks for considering,
Sincerely
Mari Barkhoyan
