## Образование

- **WEB Development**

Machanents Educational Complex of Cross of Armenian Unity NGO  
01.03.2022/02.11.2022

Successful Completion Of Six Months WEB Programming

## Обо мне

I specialize in creating successful, responsive websites that seamlessly blend speed and user-friendliness. With my expertise in both front-end and back-end development, I bring a holistic approach to web development projects.

On the front-end side, I excel in crafting visually appealing and interactive experiences using HTML, CSS, SASS, JS, Bootstrap and JQuery. From designing intuitive user interfaces to implementing engaging features and animations, I strive to captivate users and deliver exceptional digital journeys.

When it comes to back-end development, I am proficient in Laravel, PHP, MySQL, and AJAX. Leveraging these technologies, I create robust and dynamic websites with seamless data management, efficient server-side processing, and enhanced user interactions.

In addition to my technical skills, I am well-versed in Git and GitHub, enabling me to collaborate effectively with teams and manage version control seamlessly.

By combining my expertise in front-end development with a strong foundation in back-end technologies, I create medium-sized websites that are not only visually stunning but also highly functional and performant. My goal is to provide a well-rounded web development experience that exceeds expectations, delivering exceptional results for every project I

undertake.
