

Pavel Borodin — Python-developer

⬆ Junior
📍 Remote
💰 700 - 1 500 € (евро/мес)
✉ Контакт: geeklink.io/cv-76609

Навыки

CSS, Django, Docker, DRF, HTML, JS, Python, React.

Опыт работы

- JSC RZD

05.2020-Now - Python-developer/Network administrator

Образование

- Magister IT

Russian University of Transport
09/2013-06/2021

Обо мне

Python developer. I have experience working with the following technologies, in order of use: Django, DRF, Docker, PostgreSQL, REST, HTML, CSS, JS, React, Git, Linux, Nginx, asyncio.

I develop and maintain the IVA VCS monitoring client using the above technologies, which displays the important components on one page, and which replaces the monitoring written by the IVA developers themselves, and also reduces the response time administrators by 50%.

I also developed a business process automation server using FastAPI, which allowed employees of an adjacent department to reduce the amount of labor required for processing documents several times: from 1-2 months to 15 minutes. Himself without bad habits. In my free time I go to the gym, do self-study, learn English and Spanish. I also plan to develop into a Fullstack developer.
