Обо мне

Hello! My name is Ivan, and I'm a highly skilled Python Back-end Developer eager to make a significant impact as part of your team.

My technology stack includes:

Flask
Postgres, SQLite
SqlAlchemy, Flask ORM
FastAPI, aiohttp
Flask - RestX
Virtualenv
Docker
Nginx
Linux terminal, BASH
GIT
CI/CD
Logging, loguru, Unittest, Swagger
Grafana, Prometheus

I have hands-on experience in developing FastAPI applications, including my recent work on a dynamic application for Lasertag Arena. This project involved building robust APIs, integrating with various services, and ensuring optimal performance for a seamless user experience.

In addition to my expertise in FastAPI, I have successfully developed chatbots for Telegram, demonstrating my ability to create efficient and interactive communication tools.

I possess strong skills in asynchronous programming and apply solid principles of object-oriented programming, such as SOLID. I am always ready to take on new challenges and continuously improve my skills.

I am genuinely enthusiastic about the possibility of joining your team and contributing to the growth of your projects. I am available for interviews and open to discussing further details. I look forward to the opportunity to showcase my value and enthusiasm in your company!
