## Навыки

Aerospike, Amazon Web Services (AWS), Apache Kafka, ArgoCD, Bash, ClickHouse, Continuous Integration and Continuous Delivery (CI/CD), Debian, DNS, Git, Helm Charts, Kubernetes, Linux, Linux System Administration, Nginx, Python, RabbitMQ, Snowflake, System Administration, terraform, VictoriaMetrics.

## Опыт работы

- **Omniverse**

**November 2022 - Present** - Senior systems engineer

Building a highly scalable real-time bidding platform (1kk rps) with machine learning and anti-fraud.

- **Tango Me**

**September 2021 - October 2022** - Lead systems engineer

Designing infrastructure to meet requirements  
Perform research on a possible tools improvement  
Implementing, managing, maintaining infrastructure as a code  
Configuration, implementation, troubleshooting for logging/monitoring/alerting solutions  
Configuration, implementation, troubleshooting for CI/CD pipelines  
Engineering management

- **SoftSwiss**

**March 2020 - July 2021** - Chief systems engineer

Supervising all technical execution aspects of DevSecOps-driven department  
Building service-oriented engineering teams  
Designing infrastructure to meet requirements  
Assuring the integrity of company technical assets and compliance with the regulations of gaming authorities  
Participating in all phases of the infrastructure development related to a variety of modern programming languages, databases, and business intelligence tools  
Serve as the primary technical point-of-contact for all infrastructure-related needs  
Provide leadership in the development of technical staff through strategic hiring, mentoring, and training

- **Syberry**

**August 2013 - February 2017** - Senior systems engineer

Implementing, managing and maintaining infrastructure as a code  
Maintaining internal and external servers of company, clients of company  
Utilizing script languages to develop automation for servers  
Utilizing script languages to develop deployment scripts for CI  
Consulting team of developers

- **Extmedia**

**September 2010 - December 2013** - Senior systems engineer

Utilize scripting languages to develop automation for servers  
Develop server templates  
Experience with configuration management tools  
Implement and integrate new technologies into existing environment  
Maintaining computing environment integrity, availability, reliability and effectiveness

## **Образование**

- **Specialist, Radiophysics**

Belarusian State University  
2004 - 2009

## **Обо мне**

I'm responsible for the development and maintenance of efficient systems and processes. The main challenges are to investigate, troubleshoot, and assist in design solutions to complex engineering problems. My duties are systems operations, systems performance, cost analysis, training and supporting.
