MYITSchool

2022

Обо мне

Hello. I am looking for new career opportunities. Perhaps I can be useful to you.

My contacts, at any time you can discuss all the questions you are interested in:

Github: <https://github.com/macherevilyne>

Development of telegram bots

□ Development Principles:

- DRY, • KISS, • SOLID, • YAGNI

Practical experience in building web apps from scratch:

□ The project "Conversion of csv files to MySQL database":

- Python, • Django, • MySQL

A web application with two-factor user authentication using the Google Authenticator.

Authorization of users by qr code and a one-time password

A form for uploading csv files by authorized users. Converting these files to a MySQL database using the Pandas module

□ The project "Electronic queue for finding cargos and transport":

- Development of website pages with the possibility of registration, authentication, and authorization of users.
- Creating models and their relationships
- Creating a form for transport proposals for authorized users.
- Bootstrap, CSS, HTML were used for design.
- Creating pagination.

Technologies have been put into practice:

- Python, • Django, • DRF, • API, • SQLite, • MySQL, • PostgreSQL, • Bootstrap, • HTML, • CSS, • GIT, • GitHub
- Excellent communication skills: proven ability to communicate clearly and concisely with technical specialists, business users, and customers
- I work with large amounts of information.
- Continuous self-development and improvement, hard-working with a zeal to learn new technologies
- The main task is the result, set goals for myself and always bring all tasks to the end.

Hobbies: sports, tourism, cooking. I actively study English.
