Образование

• Information system and technologies

Polessky State University
2014-2018

Обо мне

I'm a software engineer with 5+ years of experience.

I'm an experienced full-stack developer. I've been working with banking software and PLM system.

But I don't focus on just one area and I'd always be happy to try something new.

Also, I have experience of mentoring and leading small team of up to 10 people as deputy of team lead.
