Навыки

Django, DRF, Effector, JavaScript, Node.js, Python, React, Redux, scss, TypeScript.

Опыт работы

- **DOM RF Bank**

  05.2023/to date - Middle Frontend developer

- **Rosneft**

  01.2022/04.2023 - Frontend developer

Образование

- **Development of oil and gas fields**

  Tyumen State Oil and Gas University (TSOGU)
  09.2002/06.2007

Обо мне

A dedicated Frontend Developer with progressive experience in web development and engineering. Proven track record of managing and optimizing web platforms in the banking and energy sectors, enhancing efficiency, and reducing labor costs. Proficient in a multitude of technologies including React.js, Redux, Typescript, SCSS, and GitLab. Demonstrated success in collaborating within Scrum teams, leading projects, and implementing new service offerings. My experience extends to analyzing data using PowerBI and writing auxiliary services using Python (Django), resulting in significant profit increases in previous roles. My objective is to apply my skills and expand my horizons as a Frontend Developer.
Underwent comprehensive training in a series of modules including Introduction to Programming I (88%), Discrete Mathematics (78%), Fundamentals of Computer Science (67%), How Computers Work (58%), Introduction to Programming II (72%), Algorithms and Data Structures I (89%), Web Development (77%), Algorithms and Data Structures II (68%), and Object-Oriented Programming C++ (85%) at Goldsmiths, University of London. I possess a passion for frontend development that inspires me to wake up at 5 a.m. to expand my skill set by reading various articles (on platforms such as Medium, Habr) and books. In addition to my professional interests, I enjoy swimming and cross-country skiing in my leisure time.
