Навыки

aiohttp, Docker, FastAPI, Flask, Go, Grafana, MongoDB, PostgreSQL, Prometheus, Python, Redis, RIDE, Sanic, SQL, SQLAlchemy.

Опыт работы

• Diasoft

August 2011/march 2014 - Senior software engineer

Responsibilities:

- developing the server and client parts
- training new employees
- verifying technical tasks
- consulting on program functionality

Technologies:

- SQL
- Delphi
- MsSql

Projects:

- SWIFT for VTB bank
- Legislation Support
- Reports for banking

• Тензор

March 2014 / june 2017 - Middle software engineer

Responsibilities:

- development of a new functional
- training of new employees
- quality control of work performance
- interface development

Technologies:

- Python
- SQL
- Postgresql
- JavaScript

Projects:

- automation of company processes for working with SVN and GIT
- vacation calendar functional
- projects management functional

- tasks management functional

- **BESK Labs**

July 2017 / october 2017 - Software engineer

Responsibilities:

- development services

Technologies:

- Golang
- Docker
- Python
- Redis

Projects:

- CS:GO roulette
- aggregation of data from bookmakers

- **RealWeb**

May 2018 / september 2019 - Senior software engineer

Responsibilities:

- development of microservices
- processing of existing legacy code
- training of new employees
- quality control of work performance

Technologies:

- Python
- Golang
- SQL
- GRPC
- Redis
- Postgresql
- Docker
- Kubernetes

Projects:

- statistics gathering service
- golang SDK
- payment service for advertising offices
- pixel service for tracking click on banners
- proxy service for api requests to advertising systems

- **Assaia**

September 2019 — may 2020 - Senior software engineer

Responsibilities:

- development of microservices
- rework of current architecture
- processing of existing legacy code
- quality control of work performance

Technologies:

- Python
- SQL
- Redis
- NSQ
- Postgresql

- Docker
- Django channels
- Flask
- SQLAlchemy

Projects:

- Message bus architecture
- Alert service
- Identification service
- Backend service

• **Intento**

November 2020 / July 2021 - Senior software-engineer

Responsibilities:

- development of microservices
- processing of existing legacy code
- quality control of work performance

Technologies:

- Python
- SQL
- Redis
- Postgresql
- Docker
- Flask
- SQLAlchemy
- aiohttp

• **NutsOn**

August 2021 / April 2022 - Senior software engineer

Responsibilities:

- development of microservices for advertising cabinet
- develop architecture

Technologies:

- Python
- SQL
- Redis
- Postgresql
- Docker
- FastApi
- MongoDB
- Kafka
- Golang
- Krakend

• **Waves tech**

April 2022 / August 2023 - Senior software engineer

Responsibilities:

- develop microservices for crypto wallet
- develop smart contracts
- verifying technical tasks
- code review

Technologies:

- Python

- Sanic
- WebSockets
- aiohttp
- Redis
- Grafana
- Prometheus
- PostgreSQL
- Docker
- IPFS
- RIDE (smart contracts)
- grpc

Projects:

- service for tokens swap
- service for token rates and token info
- service for user crypto investments portfolio
- smart contracts for auction (Vickrey Auction)
- service for serving files from IPFS

Образование

- **Applied Informatics**

Yaroslavl State Technical University
2006/2011

Обо мне

I'm a software engineer with 12 years of experience in the software industry. My focus area for the past few years has been back-end development with Python and many different frameworks, but I'm also skilled in development with Go. Currently i'm living in Georgia
