Навыки

Alembic, Bash, ClickHouse, Docker, FastAPI, Flask, Gitlab CI/CD, Linux, MongoDB, PostgreSQL, pytest, Python, Redis, SQLAlchemy, VUEJS.

Опыт работы

• KamaGames

March 2021 - Present - Server Developer

- Developed a monitoring and alerting system (backend/frontend) working with Appsflyer Partnership API.
- Developed a web application (backend/frontend) to upload and publish Google Play APKs using their Publisher API. Automated gathering patchnotes and locales for published builds.
- Developed a separate web application (backend/frontend) as an alternative frontend to Apple Search Ads API to automate routine things and achieve more than official web interface can provide.
- Developed a Telegram bot to help candidates apply for different positions in company and get chat with HR department via bot.
- Developed a Telegram bot to gather information from workers on daily basis with data analysis and export to XLSX.
- (multiple projects) Replaced static JS frontends with reactive VueJS alternatives.
- Refactored and implemented new features to "secrets vault" application written in Go and PyQT.
- Onboarded new team members.

• Sintels JSC

October 2017 - March 2021 - Backend Developer

- Developed a Python3 application to help interacting with baremetal servers via SSH commands.
- Developed a frontend for that application using HTML5 and jQuery.
- Improved Company's own infrastructure with scripting, monitoring and security.
- Built custom Ubuntu ISOs generator for Linux.
- Made a Squid plugin to dump captured HTTP traffic using C++/Poco/eCAP

Обо мне

Good day, everyone! Looking for new career opportunities, but first, let me introduce myself.

I'm fullstack developer and my area of expertise is making Web applications, mostly using Python (6+ years of exp.) and VueJS (2+ y.o.e.). Though I'm ready for other adventures and different projects which will drive the world.

Currently living in the Philippines, open for both relocation and remote work.

My skills, including, but not limited to:

Python: FastAPI, Flask, pytest, SQLAlchemy, REST APIs, aiogram

Other: VueJS, Docker, GitLab CI/CD, PostgreSQL, Redis, MongoDB, Clickhouse, automatization, chat bots (mostly Telegram) and more.

Languages: Russian (native), English (intermediate).
