Навыки

swift, UIKit, XCode.

Опыт работы

- **BSL**

2020 - present time - Software Engineer

Образование

- **Power Engineering**

Belarusian National Technical University
2014-2019

Обо мне

- 3 years of commercial experience with iOS software development
- Solid understanding of the full mobile app development life cycle. Ability to work independently and in a team
- Advised the development team to implement the most flexible and convenient user experience
- Built applications for a range of iOS versions and different devices
- Have knowledge of the Apple App Store Process, Apple Approval Process, testing (TestFlight) and publishing apps
- Designed and implemented multi-layer applications using most common patterns (MVC / MVP / VIPER / Coordinator)
- Integrated maps libraries into existing applications (CoreLocation, YMK)
- Implemented custom and reusable UI components (both with XIB and code)
- Have great experience with REST services (NSURLSession / Alamofire / Moya) and local caching
- Understanding of multithreading(GCD) and asynchronous code
- Basic knowledge of Augmented Reality frameworks (ARKit, RealityKit, RealityComposer), SwiftUI, RxSwift
- Good Team Lead skills: distribution of tasks, estimating, consulting etc.
- Excellent communication skills
