Agile, Git, HTML and CSS, JavaScript, jQuery, React, Vue.js.

Опыт работы

- **Infomedia d.o.o**

    June 2022 - Web developer

Образование

- **Web development, React Development**

    Udemy
    2022

Обо мне

Middle Web developer, 2 years of experience working for a local e-commerce company, maintaining and implementing new features for their Web shops.

My stack includes: JavaScript, React, Next.js, Vue, jQuery, HTML and CSS, Git, Agile

In my everyday work I use JavaScript, JQuery, HTML, CSS extensively, bringing my skills in that area to a high level. On a separate, commercial project, I had the opportunity to work with Vue.js 3 framework, giving me a solid background in that skill. Since recently I've been working on a number of smaller private projects with React library and Next.js.

My other skills include basic PHP, Laravel, Blade and a good knowledge of C++ acquired through my experience working on Paradox Game Converters - a series of open source projects designed for video games produced by Paradox Studios.

I'm a quick learner and I love working on projects that bring new experience and learning something new in the process.
