Навыки

Android SDK, Java, Kotlin.

Опыт работы

- **GeekStudio**

  January 2022 to August 2022 - Android Developer

  Development Application from scratch
  Building the Application Architecture
  Code Review

- **It Courses Geektech**

  July 2021 to January 2022 - Mentor of Android Development

- **TimelySoft**

  April 2022 to December 2022 - Android Developer

  Projects:
  Givee – Cashback and aggregator system.
  TSJ.Security + TSJDom.Com – TSZ portal is an Internet site for your partnership (TSZ, SNT, etc.), which provides special mechanisms for the distribution, storage and operational exchange of information between the board and members of TSZ.
  Architectural Design: I played a pivotal role in establishing the Clean Architecture for both projects.
  Daily Vehicle Management: I developed features to manage the list of vehicles scheduled to enter or exit on a given day.
  Vehicle Verification: I integrated functionality for vehicle verification through both camera-based scanning and manual license plate entry, utilizing the CameraX library.
  Authentication: For secure user access, I implemented OAuth 2.0 libraries.
  Bug Fixing: Actively identifying and resolving any issues that arose during the development process.

- **Baraka**

  January 2023 to September 2023 - Android Developer

  Integration of Yandex Mapkit for viewing listings through maps.
  Implementation of listing sorting based on coordinates (distance sorting).
  Development of a feature that allows users to either select a location on the map or search for an address when creating a listing, ensuring precise location information in advertisements.
  Addition of label functionality to listings, such as the ability to categorize listings as "Remote Work."
  Participating in regular sprint reviews;
