Навыки

Bootstrap, CSS, Docker, Git, HTML, JavaScript, Jest, Jira, Next.js, Node.js, Python, React, Redux.js, scss, Tailwind, TypeScript, webpack.

Опыт работы

- **GrowFood.Pro**

  Sep 2015 - Feb 2018 - Fullstack-разработчик

  Food-tech start-up, healthy food delivery ($9 mln investments for 5 years).
  ● Designed and developed the main site, web applications, promo landing pages by using Axure, Figma, JavaScript, different CMS
  ● Worked on analytics and a snippet constructor

- **Softwerke**

  Mar 2018 - Nov 2019 - Fullstack-разработчик

  Outsourcing company. At the start I worked as a Frontend developer making promo applications, and after proving my efficiency I was referred to work on one of Saas products, SAP Web Analytics.
  ● Developed custom reports utilizing SAPUI5 JavaScript framework, Hana DB and Java Spring Boot.
  ● Communicated directly with inner customers and collaborated with the international distributed team.
  ● Successfully debugged, fixed and delivered over 50 custom reports.
  ● Developed web applications and components using AEM (Adobe Experience Manager), Javascript, Css, HTML.
  ● Conducted 5 technical interviews of Frontend developers.

- **Innodrive**

  Mar 2020 - May 2022 - Fullstack-разработчик

  The company had two departments: sales of micromotors and tech. I led two projects in the tech department from scratch: AR Assistant and B2B AR Solutions.
  ● Developed the frontend part of MVP utilizing React ecosystem within 3 months in collaboration with backend and Unity developers, a product manager and a designer.
  ● Established a video stream connection between AR glasses and web browser by implementing WebRTC.
  ● Created an AR-glasses remote control (light, zoom, screenshots) by utilizing sockets.io.
  ● Developed a document viewer and an editor utilizing konva.js library.
  ● Developed mobile web applications featuring AR experiences using AFrame and three.js.
  ● Conducted over 20 technical interviews of Unity and Backend developers.

- **Botmaker**

  Jul 2022 - Nov 2023 - Frontend-разработчик

Botmaker – BotTech startup, main product is a no-code platform for creating chat-bots in Telegram messenger. More than 10000 active bots, specialized for offline business. My actions have had a positive impact on the development process speed and have reduced development costs.

● Optimized internal workflows and boosting operational efficiency.
● Reduced delivery time by approximately threefold through optimizations.
● Mentored a junior front developer, fostering growth, skill development and independence.
● Implemented Redux state manager and unit tests using Jest, ensuring code quality and reliability.
● Developed new features such as AMO CRM integration and shop constructor using functional and object oriented programming, React and Typescript.
● Maintained version control using Git, ensuring collaboration and codebase integrity.

Образование

- **Informational Technologies in Media Industry**

  Saint Petersburg University of Technology and Design
  2010/2015

  MEng
  Grade: 4.8

- **Programing in Python**

  Meta (Coursera)
  2024

Обо мне

I'm a Frontend Developer with over 6 years of hands-on experience, with a proven track record of building efficient, secure and user-friendly React web and mobile applications. Currently seeking a challenging role, leveraging proficiency in React ecosystem, Typescript, Python to contribute to the development of innovative web-based platforms.
