Навыки

Angular, GraphQL, HTML, JavaScript, scss, TypeScript.

Опыт работы

• Jaxel

Aug 2022 - now - Senior Frontend Software Engineer

The Solar Panel Inspection Information Management System is a comprehensive web-based application designed to streamline the process of inspecting and maintaining solar panels. The system allows users to record, manage, and analyze inspection data, ensuring efficient and effective monitoring of solar panel performance.

Key Contributions:

I developed custom components using Form.io for dynamic form creation and management.

I worked with Mapbox to integrate interactive maps into the application.

I created new functionalities for conducting solar panel inspections and tracking identified issues.

I developed functionality to generate PDF reports based on user-entered data. These reports provided a comprehensive summary of inspection results, including visual evidence and detailed annotations.

This project was dedicated to advancing the viewing of 3D models for buildings, complete with a comprehensive suite of tools designed for visualization, precise measurements, and efficient work planning within these architectural structures.

Key Contributions:

I played a pivotal role in optimizing and bolstering the existing project functionalities.

I actively drove the development of new features, enriching the project's functionality and user experience. This involved the creation of tools and solutions that expanded the project's capabilities and addressed emerging challenges.

Skills: Angular · Ngxs · GraphQL · Mapbox · BabilonJs · JavaScript · TypeScript · HTML · Scss

• IT_One

Aug 2021 - Aug 2022 - Senior Software Engineer

This platform was designed to provide users with a robust suite of tools for managing their profiles, tracking the status of documents, and accessing vital user information. Additionally, the project featured advanced capabilities for requesting information about documents and user data from third-party systems.

Key Contributions:

I was actively involved in crafting a user-friendly environment for profile management.

I worked on tools that facilitated the seamless retrieval of information about documents and users from third-party systems. This required a deep understanding of data integration and communication with external platforms.

I actively contributed to the development of cutting-edge features and functionalities that elevated the platform's capabilities.

Skills: Angular · TypeScript · JavaScript · HTML5 · CSS

Обо мне

I have always had a passion for technical disciplines, starting from my school years with a strong interest in mathematics and physics. I hold a degree in Applied Mathematics and Computer Science. As a perfectionist, I strive to see tangible results from my work and aim to create solutions that users find practical and convenient.

I have developed applications across diverse sectors, including healthcare, education, energy, and document management.

I am proficient in English at a B1 level.

Beyond my professional interests, I enjoy traveling and studying psychology, constantly seeking to broaden my horizons.
