Навыки

CSS, Docker, Git, HTML, JavaScript, Laravel, MySQL, OOP, PHP, PostgreSQL, Redis, SOLID, SQL.

Опыт работы

• "OPTOM EXPRESS GROUP" LLC

February 2024 - Present - Junior PHP Developer

As a Junior PHP Developer, I was involved in several key aspects of project development:

- I made an administrative panel for managing users, tags, product cards, mainly developed the back-end, and part of the front-end.
- Added role management, information editing, and user deletion.
- Developed complex forms for creating product cards, as well as managing goods in stock and viewing the status of goods and quantities.
- Implemented password reset for users, configured mailer, email verification via token.
- Added complex SQL queries using Join.

Technologies: PHP, Laravel, SQL, PostgreSQL, JavaScript, Blade, Redis, Postman, Git

• Laravel pet project

2024 - Developer

Laravel pet project is a comprehensive web application designed for managing deliveries and administration, tailored specifically for a coffee shop.

Functional capabilities:

- Users can create accounts and log into their personal dashboard, where they can view and delete their orders.
- Couriers have their own dedicated dashboards displaying a collective list of delivery tasks and their personal assignments.

Key features:

- CRUD operations for users and couriers, including login, logout, and password recovery functionalities.
- Order creation with automatic distribution across departments, starting with the kitchen, based on selected delivery methods.
- An administrative panel granting full access to manage users, couriers, posts, and products.

Technologies: PHP, Laravel, JavaScript, Blade, MySQL, Git, Postman
