Обо мне

Skilled Frontend Developer with extensive experience in web page development, specializing in HTML5, CSS3, and
JavaScript. Over the past year, I have successfully delivered high-quality user interfaces, collaborating with designers to
optimize applications, develop features, and maintain brand consistency. My proficiency in frameworks like React and

version control systems such as Git ensures efficient project execution and team collaboration. I am deeply committed to web development, constantly refining my skills, and exploring innovative technologies to enhance web application efficiency
