Обо мне

As a Full Stack Web Developer, I've worked extensively with Laravel and Vuejs. My responsibilities include designing, developing, and maintaining web applications.In backend development using Laravel, where l handle tasks such as API development, database management, and server-side logic implementation. On the frontend, I utilize Vue.js to create interactive user interfaces, integrate with backend APis, and manage state using Pinia Vuex. I'm experienced in deploying applications, optimizing performance, and ensuring code quality through testing and code reviews.
