Обо мне

I am a highly skilled software engineer with experience in full-stack development, machine learning, and DevOps. With a strong background in Python, I have developed web applications, RESTful APIs, and automated bots using frameworks such as Django, Flask, Fastapi, and Pycaret. I also have experience with mobile development using Flutter and integration through RestApi. In my current role as an ML Engineer at Alif Bank, I am developing credit scoring and limits projects for customers, as well as chatbots based on NLP. With my excellent problem-solving skills and attention to detail, I am confident in my

ability to tackle any software development challenge.
