Навыки

Bash, Docker, FLUX, GCP, Git, Gitlab CI, Gradle, Hashicorp Vault, Helm, Jenkins, Kubernetes, Linux, Maven, OpenShift, terraform, Terragrunt.

Опыт работы

• EPAM Systems

2021-present - DevOps

- Developed CI/CD for 2 different projects using GitLab CI, Flux, Jenkins;
- Developed and maintained scalable infrastructure using RedHat OpenShift and Kubernetes, managing 30+ microservices;
- Automated build and deployment pipelines reducing deployment time by 50%;
- Configured roles and policies, auth methods in HashiCorp Vault;
- Implemented static code analysis in SonarQube;
- Configuring and maintaining Crunchy Postgres Operator DB Cluster;
- Designed and implemented new infrastructure architecture in GCP;
- Led the migration of microservices from AWS PaaS RedHat OpenShift to GCP GKE;
- Pioneered the use of node auto-provisioning, resulting in a 20% decrease of GKE costs;
- Managed GCP services, including Kubernetes Engine, Cloud Storage, IAM and Cloud SQL to support project needs;
- Configured application uptime monitors, dashboards, and alerts with Elastic APM, Grafana, and OpenSearch;
- Automated routine tasks and jobs using python and bash.

Обо мне

Experienced DevOps Engineer proficient in automation application deployments on cloud platforms (GCP), orchestrating containerized applications and developing robust CI/CD pipelines. Demonstrated ability to collaborate across departments, contributing to timely project completion, while also excelling in independent work. A purpose-driven, versatile professional committed to fostering teamwork and achieving organizational goals.
