Опыт работы

• Pet Project

07.2023/present - Quality Assurance Engineer

Currently, I'm expanding my knowledge in JavaScript, MySQL, and Visual Studio Code. Additionally, I'm developing leadership skills in an IT testing team at RedRoverSchool. I am completing an internship in Web/Bitrix (CRM Bitrix24) with certifications as a Content Manager, Administrator (Basic), and Administrator (Modules Bitrix). Additionally, I am currently finalizing a test MVP project (20 participants, including 5 testers) with Yandex Acceleration, involving work in Qase and Git (<https://github.com/GitDym>). This project entails the development, testing, and launch of a website for cleaning apartments and houses.

I have started a new pet project, which is under development, involving testing of an Android application and PM-related functions.

Here is a brief link to what I have accomplished and tried:

10.2022/07.2022 - Quality Assurance Engineer

Testing of web applications, mobile applications, and APIs: Proficient in testing various types of applications, including web applications, mobile applications, and software application interfaces.

Test analysis and test design: Capable of analyzing application requirements and developing test cases, checklists, Mindmaps, and flowcharts to ensure testing compliance with functional and non-functional requirements.

Participation in requirement analysis and refinement: Actively participated in the analysis and refinement of requirements for new functionality, contributing to improved testing quality.

Regression testing: Conducted regression testing to ensure application stability after making changes.

Bug reports: Created bug reports and tracked their status using tools such as YouTrack, Qase, and Jira.

Mobile app testing: Have experience in testing mobile applications and working with tools such as Xcode, Android Studio, and Postman.

Tools: Worked with various tools, including Figma, Charles, DevTools, Postman, SQL, Mindmap (Miro), and flowcharts (Draw.io).

Equivalence classes and boundary values: Utilized these methods to develop test cases and ensure comprehensive testing coverage.

Basics of test automation: Gained foundational knowledge of test automation, which can help expedite and enhance the efficiency of the testing process.

Teamwork and reviews: Collaborated with mentors, underwent regular reviews, and interacted with project teams to jointly work on product quality.

Participation in Peer-to-peer projects: Participated in a Peer-to-peer project, conducted reviews of student work, and provided feedback on the Eduflow platform.

1997/2022 - Lawyer, Deputy Chief Executive Officer, Director

I began my career as a lawyer in November 1997. I have had a broad range of experience, serving as both a lawyer and as a controller for a participant of RCB (Retail Clearing Bank), as well as a general director of an Investment Management Company (IMC), and as a head of legal departments in various companies. I've also been involved in preparing companies for international standards certification. Furthermore, I initiated and actively participated in the implementation of CRM (Bitrix 24).

Обо мне

As a Quality Assurance Engineer at Pet Project, I apply my test engineering skills and knowledge to ensure the quality and usability of Web application for pet owners and lovers and Android keyboard applications. I have a Test Engineer Certificate from Yandex Practicum, where I used test documentation, web and mobile app testing, test automation, and test management tools such as Figma, Charles, DevTools, Mindmap, Swagger, and Jira.

Here is a brief link to what I have accomplished and tried:

<https://docs.google.com/document/d/1IBiE1It9embuEqWoCK9wo0Zu4LsyR0kGfTiMYkRlZRw/edit>

I have 25 years of legal practice and a diploma in Governance Risk and Compliance from the International Compliance Association. I also have a Master's degree in Infocommunication Technologies and Communication Systems, and an internship in Japan on Quality System for Small and Medium Enterprises. I am passionate about learning new technologies and methodologies, and I am currently expanding my knowledge in JavaScript, MySQL, and Visual Studio Code. I am also involved in a test MVP project with Yandex Acceleration, where I collaborate with a team of developers and testers to launch a website for cleaning apartments and houses. I am looking for new challenges and opportunities to apply my testing and legal expertise in innovative and dynamic environments.
