Обо мне

My name is Maria Semibratova. I'm the Lead Business Analyst. I have been working as a Business Analyst for more than 8 years. Frequently I've combined my Business Analyst role with Project Manager and Delivery Manager roles.

- My work primarily revolves around creating mobile and web applications for B2B and B2C. I've had the opportunity to work in diverse industries such as FinTech, Healthcare, EdTech, Game dev, Oil and Gas business, Food and beverage, and Sport. I'm always open to exploring new and familiar spheres and domains.
- As a manager, I've had the privilege of working with teams ranging from 10 to 70 people, including Product Teams, Development Teams, QA Teams, Data Analysts Teams, Design Teams, and Business Analyst Teams. I've played a pivotal role in forming and leading these product teams, and from the outset, I've established effective onboarding and communication processes.
- Developed and optimised business processes for companies and designed document management systems, including policies and templates.
- My career has taken me across a range of industries, including FinTech, Healthcare, EdTech, Game Development, Oil and Gas, Food and Beverage, and Sport. In each of these areas, I've applied my skills as a Business Analyst and Manager to drive success and innovation.

Over the years, I have collaborated with English-speaking teams from the UK, the USA, Norway and Denmark. I've created documents in English and communicated in English as well.

Currently, I am interested in my professional growth and continued work in building processes and launching products. I want to use my skills in reengineering processes for international teams. To achieve this, I will continue to gain project management skills and expand my knowledge of PMBOK and BABOK.
