## Навыки

Algorithms and Data Structures, Apache Kafka, AWS, Docker, Flyway, Gradle, Java 8+, JUnit, Liquibase, Mapstruct, Maven, Microservices, Mockito, MongoDB, Open API/Swagger, PostgreSQL, RDBMS, Redis, Spring Framework.

## Опыт работы

### • Itechart Group

**01.2024-06.2024** - Java Software Engineer Trainee

techart Group, Minsk

Developed backend for auction platform application using Spring Boot, Spring Data JPA, WebFlux, PostgreSQL + Postgres Full Text Search, Flyway/Liquibase for DB migrations, Redis for in-memory storage and pub- sub messaging, Docker, AWS (EC2 , IAM, S3, SQS + SNS, Cognito).

### • SWS

**07.2024-10.2024** - Java software engineer

Project: Intelligent Data Processing System

Key responsibilities: development and implementation of an independent risk management subsystem architecture with ML integration and focus on optimized data processing across multiple microservices.

Tech stack: Java, Spring Framework (Boot, Data, Security, Cloud Data Flow, Batch), Apache Kafka, Jackson, Mapstruct, PostgreSQL, MongoDB, Redis, Docker, JUnit, Test containers.

## Образование

### • Bachelor's degree

Belarusian State University  
09.2020-07.2024

## Обо мне

I am a dedicated Java Software Engineer with a solid educational foundation from Belarusian State University. With extensive experience in developing efficient and scalable software solutions, I excel in problem-solving and delivering high-quality code. I am proficient in various Java frameworks and tools, and committed to staying up-to-date with the latest industry trends. My strong analytical skills and attention to detail enable me to contribute effectively to team projects. I am passionate about leveraging my expertise to drive technological innovation and success.
