## Навыки

ASP.Net Core, C#, CQRS, CSS, Dapper, DDD, EF Core, gRPC, HTML, Java, JS, Modular Monolith, MS SQL Server, PostgreSQL, React, Redis, REST, SQL.

## Опыт работы

### • Fuse8 & ByteMinds

**07.2023/09.2023** - Backend Developer (.NET)

Successfully completed internship — mastered key backend tools (.NET, EF Core, PostgreSQL, Docker).  
Built currency API project with REST and gRPC, applied Clean Architecture, set up Docker with health checks and restarts

### • GTSolutions

**09.2023/09.2024** - Fullstack Developer (.NET + React)

Web platform for automating training and certification of aircraft technicians. Worked in a team of 9: 3 full-stack developers (myself), 2 UX/UI specialists, 1 designer, 1 front-end developer, 2 back-end developers. Styled the interface using React, created models and migrations with EF Core, implemented CRUD endpoints in ASP.NET Core, configured roles and authorization.

Achievements:

- Added form validation — reduced the number of submission errors
- Extracted reusable UI elements into components — simplified maintenance
- Implemented responsive design — improved UX on mobile devices
- Implemented server-side pagination — sped up loading of large lists
- Set up role-based authorization — enhanced security and usability
- Implemented PATCH with validation — reduced unnecessary updates and database load
- Developed a gRPC service — accelerated inter-module communication
- Simplified the EF Core layer — reduced coupling and made the code cleaner
- Rewrote cache warming as async tasks — reduced load on PostgreSQL

### • IT Build Group

**10.2024/03.2025** - Backend Developer (.NET + Web3)

Cryptocurrency platform for processing fiat and cryptocurrency transactions, with support for multi-currency wallets and transactions. Worked in a team of 5: 2 back-end developers (myself), 3 front-end developers, 2 designers, 1 QA. Implemented new features for the admin panel, fixed bugs, and wrote documentation.

Achievements:

- Covered functionality with unit tests (xUnit) — improved code quality and sped up error detection.
- Implemented caching with Redis — reduced load and sped up data access.
- Introduced the Result pattern for error handling — improved readability and consistency in error handling.

## Образование

- **Bachelor of Mathematics and Computer Science**

Moscow State University MV Lomonosov Baku Branch  
2020/2024

## Обо мне

Full-stack web developer with experience in .NET and React, and a background in algorithms and data structures.
